Scenario:

You are a freshman student majoring in business at the University of South Carolina. After the first week of classes you quickly realize how difficult the transition will be due to the new learning environment. To help with the transition, you download the centralized learning application on your phone to stay organized throughout the semester and easily access any content needed.

Task 1:

Using the inputs given, login to the app. Then, navigate to the dining section and order food from Twisted Taco.

Task 2:

You have homework due for CSCE190 but cannot remember what the assignment is. Navigate to the CSCE190 course page where the homework and its due date is listed.

Task 3:

You are living on campus and rely on the buses to get to your classes on time. Navigate to the page that has the bus schedule and locations.

Notes:

What changes you should make to your application? (minimum of 2)

1. Design is to plain, needs some color and maybe a design behind buttons.
2. The "Order Food" page is a little confusing and needs revision.

What you need to keep the same for your application? (minimum of 2)

1. Navigation is easy to understand, and the side panel makes the navigation easy and clean.
2. User liked the course pages and the button that allows you to contact professors.
